Contemporary Designer

Our contemporary designer range contains models that can be used throughout the home in living rooms, dining rooms, hallways, bedrooms, kitchens, bathrooms, conservatories or studies. Developed to reflect the latest trends in interior design these radiators will complement any modern scheme. The wide selection of sizes, formats and colour options allows you to select the perfect radiator to suit your heat output requirements, available space and interior.

Knowing the heat output required (BTU/Watts) to heat your room is key when choosing your radiator. For help on calculating this and selecting the correct size of your chosen radiator please see page 190 or visit our website www.theradiatorcompany.co.uk.

Design Prices from £105.00

We work with some of the best Italian radiator designers and manufacturers to bring you the widest choice of stylish, quality radiators.

Our Low Water Content radiators are designed for improved efficiency. Designs include dual tube technology on the Seta and Inferno ranges, both of which contribute to reduced running costs while delivering great output. For Low Water Content radiators look out for this symbol in the technical section

Choice

There is an extensive choice of vertical, horizontal, single and double formats, as well as a variety of tube designs so you can have the right combination of design and heat output.

Personalise your design with over 230 colours and special finishes. Please call 01342 302250 for a copy of our RAL and Special Finish charts.

B2 Connections (underneath)

Most vertical radiators are supplied with Bottom Opposite End (BOE) connections as standard; however in some cases selected radiators can be supplied with optional Underneath Connections allowing the valve to be positioned under the radiator, for situations where space is tight or for creating a neater finish (see the Water Lily page 29). Full details of sizes, colours, prices and options can be found in the technical section for every product.

Service

Almost all of our Designer ranges have stock lines which will be delivered in 3 - 5 working days; all stock lines are shown in bold in the technical section.

Valves & Matching Painted Valves

Complement your designer radiator with a contemporary and stylish valve; see pages 105-115 for our full selection. Almost all of our valves are available in chrome, white & nickel finishes. A select range of valves can be painted in any of the 188 RAL options plus 23 special finishes from Colour Groups 9 & A, see page 110-111 for details.

Sectional Aluminium

Smooth clean lines and slim profiles make these ranges perfect for both new homes and as replacement radiators. Their practical functionality makes them suitable for living rooms, bedrooms or studies and our variety of accessories can also enhance their use in kitchens, bathrooms and hallways.

Our Sectional Aluminium ranges are available in white from stock in 3 - 5 working days; other RAL and special finishes available in up to 15 working days.

Use our online radiator builder to help select the best configuration for your room; www.theradiatorcompany.co.uk.

Energy efficient

- Helps reduce fuel bills; Aluminium's natural properties transfer heat efficiently from the heated water to the radiator. These radiators require much lower volumes of water, helping reduce fuel bills.
- Easy to control and fast to respond; good thermal efficiency gives better, more immediate control over room temperatures.
- Works efficiently with low temperature systems; the thermal properties of aluminium are a perfect match with low temperature and renewable energy systems.
- Easy to handle; lightweight sections makes them easy to install, especially on stud walls.

The use of renewable energy sources is on the increase:

- Heating systems fuelled by renewable energy tend to work with lower water temperatures.
- The thermal properties of aluminium make this type of radiator more efficient with low temperature systems
- In situations with radiators and under floor heating on the same system, aluminium radiators are a good option, as under floor heating tends to run on lower system temperatures

Design Prices from £131.00

Our Sectional Aluminium radiators are available in 4 different profiles; the Vip, Oscar, Mix and

The Vip and Oscar are also available with optional end panels (shown below and right), please specify at time of order.

Sectional Aluminium

Choice

Sectional

Our Sectional Aluminium ranges are incredibly versatile with hundreds of possible size options, all available from stock finished to your size from 3 up to 20 sections.

Colours

White RAL 9010 standard

White RAL 9010 is our standard finish for Sectional Aluminium radiators and are available from stock in 3 - 5 working days.

Italy has earned a worldwide reputation for being at the leading edge of radiator design, style and practical functionality, producing a whole host of quintessential products. The Ancona® range of Steel Multi column radiators take the classic look of cast iron and combine it with the flexibility of steel; suitable for living rooms, dining rooms, hallways, bedrooms, kitchens, bathrooms, conservatories or a study. Multiple column heights and widths provides an extensive choice of sizes to suit any room or location.

Our Ancona® range is available in two ways;

Ancona® stock (pages 51-54); is available in white in 2, 3 and 4 columns from 3 – 40 sections, for delivery within 3 - 5 working days.

Ancona® made to order (see pages 55-65) is available in 2 – 6 columns with over 500,000 different size combinations and 200 colours, delivered in 4 weeks.

Ancona®stock (pages 51 - 54)

Our stylish and timeless stock Ancona® steel multi column is held in our warehouse for fast delivery

The most popular 2, 3 or 4 column sizes in 5 height options and 3 mounting options, available from stock in White RAL 9010

Ancona® made to order (pages 55 - 65)

The perfect solution, made in Italy to fit your exact requirements

Over 500,000 sizes in 2, 3, 4, 5 and 6 column with 3 mounting options plus Curved and Bench Seat options in over 200 colours and special finishes

Ancona® stock

Ancona® Stock is our best selling sectional steel multi column range, incredibly versatile with literally hundreds of possible sizes in 2, 3 or 4 columns from 3 - 40 sections, in a choice of 3 mounting options (slip-on welded feet, cast feet or wall brackets) all available from stock in white RAL 9010 for 3 - 5 working days delivery.

Design

Ancona® from stock

- 3-5 working days for white RAL 9010
- 2, 3 & 4 column options
- 5 heights; 300mm, 500mm, 600mm, 750mm & 1800mm
- 3 mounting options; Slip-on Welded Feet, Wall Brackets
 & Cast Feet
- up to 40 pre-assembled sections, nipple & gasket joined
- 5 year guarantee

Cast Feet

Wall Brackets

Choice

Columns

All Ancona® stock radiators can be specified in either 2, 3 or 4 column depths.

Stock Mounting Options

Our Ancona® stock can be mounted in one of 3 ways;

- 1. Slip-on Welded Feet; for a contemporary look
- 2. Cast Feet; for a classic look
- 3(a). Wall Brackets (standard); means you can position your steel multi column at any height (for use with solid walls)

Chall Mall Brokers

3(b). Stud Wall Brackets; these specially designed brackets help spread the weight of the radiator providing an easy and safe fixing for stud and cavity walls. For a neater finish the hook comes painted in the same colour as the radiator and the galvanised steel back plate can be painted to match your wall colour.

Ancona® Towel Bars

Made from stainless steel, Ancona® towel bars can be added to any (new or existing) Ancona® to provide useful hanging space in kitchens or bathrooms. **Available from stock in 3 - 5 working days see page 155.**

51

Service

All Ancona® stock models delivered in 3-5 working days; stock lines listed in bold in the technical section.

Traditional Cast Iron

The epitome of traditional heating, cast iron radiators are a must for any period restoration; suitable for living rooms, bedrooms, kitchens, hallways and dining rooms. Our choice of six classic designs offer the clean simplicity of "school house" or the decorative "classic". These radiators will be a perfect match for any existing radiators and being new, they come with a ten year guarantee.

As a material, cast iron has its own unique properties; these radiators will hold their heat for a long time, compared to a similar steel model, although they are slower to heat up and therefore less responsive to sudden changes in temperature

Design Prices from £143.00

School house

Probably the most well known form of cast iron radiators, the original imported school house models bring a real charm and character to any period property.

Classic and Ornate

The original detailed, ornate designs of the Trieste with its tasteful scroll work and decorative ears brings a touch of splendour to your home. Our new Linton range reflects the style of the 1920's, with smooth clean lines and a choice of exclusive galvanised and painted finishes.

Choice

Sectional

Our sectional cast iron range is incredibly versatile with literally hundreds of possible sizes from a wide range of column depths & heights finished to your size.

Finishes

Our cast iron designs are normally supplied in a base primer finish ready for you to paint in your chosen colour. To get the best possible finish we can powder coat your radiators in a selection of the top 26 most popular colours from the RAL range and 18 special finishes, see opposite for more information.

Mounting Options

Cast iron radiators are very heavy and therefore best mounted with floor supports. Bianco and Ledbury radiators can be wall mounted using our specialised wall brackets, provided the wall is structurally strong enough to take the weight. There are two methods of floor mounting; either footed end sections or individual feet. We offer two styles of feet; our standard Cast Foot or the Paw Foot, with its distinct lions paw design

- Ledbury; available with footed end sections as standard, cast feet, paw feet or wall brackets.
- Priory; available with footed end sections, cast feet or wall brackets.
- Telford; available with cast feet, footed ends (in limited sizes) or wall brackets.
- Trieste; supplied with footed end sections only.
- Linton; supplied with footed end sections only
- Bianco; available with cast feet as standard, paw feet or wall brackets.

Service

All Cast Iron lines are stocked & listed in bold in the technical section, primer delivered in 3 - 5 working days.

Our range of valves include the classically styled Vintage XL TRV as well as the Black & Brass and Vienna valves models in both Manual and Thermostatic versions.

Cast Iron Finishes

Cast iron radiators require finishing to prevent rust forming; traditionally done using oil based paints with a high resistance to heat (at least 100°C) with a zinc based rust inhibitor used as a primer and suitable oil based undercoats. If carried out by hand this can be a long and difficult process as cast iron is very heavy and the entire surface must be covered for full protection and brushes can leave streak marks in the finish.

A wet spray system is an alternative option but can result in a finish with drips and is usually carried out off site requiring extra handling and time to complete.

We can deliver your cast iron radiators fully finished and ready for installation. We use a robust, polyester powder coat paint, which is applied by our specialist painters based in the UK, to achieve a long lasting, durable finish (please see Terms & Conditions on page 191). Delivered in up to 15 working days and for orders of over 10 radiators please allow up to 25 working days for delivery (radiators may require assembly on site if over 10 sections). As a result of the casting process, cast iron radiators have a rough surface finish with small imperfections which will show after the painting process.

Finishes

Painted RAL

Although our cast iron range is supplied in Primer as standard, we can supply all of our cast iron designs painted in a selection of the 26 most popular RAL colours these are available from stock in up to 15 working days (20 working days for the Linton). The RAL range of colours is an industry standard and we have selected the 26 most popular colours to finish our ranges of cast iron radiators; for a RAL chart please call 01342 302250.

Please Note; delivery lead times on coloured cast iron start from when we have receipt of your chosen RAL colour number / special finish in writing; please ensure the selected RAL colour number / special finish and name is included on your order.

Special Finishes

Lacquered

For a more industrial feel all our cast iron radiators (except the Bianco) can be lightly sandblasted and then treated with a protective high gloss lacquer to retain the raw characteristics of the cast iron. Available from stock in up to 15 working days (20 days for the Linton).

Polished & Burnished

Our cast iron ranges are available in a beautiful, burnished or high lustre, polished finish (except the Bianco). Created by hand, in the UK, an initial black paint is used to protect hidden, hard to access areas of the radiator and to highlight the visible polished areas; a series of burnishing and polishing processes produces the final stunning results.

Linton Special & Galvanised Finishes NEW

New for this edition, the Linton is a classic smooth design, available in 26 RAL colours, 4 special finishes, 1 galvanised finish, lacquered, polished and burnished (some of which are shown below). See pages 171-172 for more information

Please note, due to the printing process, these colours may not be representive of the true finished colour. For a Linton colour chart please call 01342 302250.

Bathroom Towel Rails

With space often at a premium, a towel rail functions as both a heat source and as a towel warmer; perfect for bathrooms, kitchens and cloakrooms

Design Prices from £107.00

We work with some of the best Italian radiator designers & manufacturers to bring you the widest choice of stylish & highest quality towel rails.

Choice

An extensive choice of styles from standard vertical formats to horizontal towel rails in a variety of tube styles including round, flat, oval and rectangular.

Electric Heating Elements & Dual Fuel

Many of our towel rails can be converted to dual fuel by adding an electrical element; this allows the towel rail to warm towels during the summer when the main heating system is switched off. Adapting your towel rail to dual fuel is easy to achieve; a separate 'T-piece' or Dual Fuel valve is used to allow the installation of an electric element alongside the standard water feed pipe. There are three types of electric elements to choose from, please turn to pages 116 - 117 for more detailed information and prices.

All towel rails that can be converted will have a dual fuel symbol in the technical section

(Please note; Towel Rails are not designed to dry soaking wet clothes or towels as this can lead to rusting of the rail).

Service

Almost all of our Towel Rails have stock lines which will be delivered in 3 - 5 working days; all stock lines are shown in bold in the technical section.

Towel Rail Accessories

These towel bars and hanging pegs are designed to fit the majority of ladder style rails and vertical tube radiators. Ideal for providing additional hanging space to air towels or hang bathrobes, they are available from stock in 3 - 5 working days in white or chrome.

Valves

Once you have chosen your radiator you can then choose a matching set of valves. High quality radiators deserve high quality valves for efficient performance and to influence the whole appearance of your finished radiator. All our valves have a 5 year warranty.

Finishes and Colours;

A wide range of finishes are available from stock; in addition selected valves can be painted to match radiators ordered from colour groups 9 & A; see page 110.

Wheelhead and Lockshield;

Radiators require two valves which work together as a pair. The Wheelhead is used to adjust the flow of water into each radiator and the Lockshield maintains a balanced flow of water around the whole system, ensuring each radiator receives the correct rate of flow in order to heat up; these will be adjusted by your installer when balancing your system.

TRV or Manual?

Thermostatic Radiator Valves (TRVs) monitor the ambient room temperature with a built in thermostat. They usually have between 4 to 6 set levels which you can select and the valve then opens and closes automatically to reach and maintain the desired level. If one room reaches the set temperature the radiator will effectively turn off whilst others continue to operate. TRVs can help maximise the efficiency of your system reducing energy consumption and they are now a requirement as part of building regulations relating to new builds and refurbishments.

Manual valves are adjusted by hand; they will allow a constant flow of water through your radiator regardless of the room temperature and radiators will only turn off when the room thermostat (usually in the hall) reaches it's set point or the programmer turns the heating off. All systems may have at least two manual valves included, on a radiator that acts as a bypass for the system (usually a towel rail) and one in the same area as the room thermostat so they do not conflict with each other.

Angled or Straight?

The choice of which format of valve to use will depend on the location of your pipe work and the position of the collectors on the radiator. Angled valves are the most common version used, the pictures opposite show how different configurations work;

- B) Angled from floor
- C) Straight from floor
- D) 3 Style on towel rail note how the heads are tucked neatly in line with the towel rail

If you are planning to move your radiators or change from horizontal to vertical you should discuss the amount of work involved with your installer and plan how to keep exposed pipe work to a minimum.

Pipe Sizes

There are a variety of different pipe sizes and materials used for heating systems in the UK: 15mm, 22mm, 28mm, in copper, plastic, iron or chrome. It is important to discuss with your installer the type of pipe work being used to connect to the radiator to ensure your valves are specified correctly.

The most common size of pipe connection in the UK is 15mm (also known as ½"); often 22mm (or ¾") pipe work is used on large or older systems with cast iron radiators. All our valves have 15mm connections as standard unless otherwise stated; if you need different connections please specify when ordering your valves.

Most pipes will be made from copper and all our valves work with this material. On older houses iron pipe work may still exist usually 22mm (¾"); you will need to specify this to ensure your valve connections are the correct size.

Over recent years push fit plastic pipe has become more popular and some plumbers may wish to directly connect the plastic pipe to the valve but our valves are not designed to operate with plastic pipes.

In some cases chrome pipe work is used to supply water to the radiator; because chrome is a harder surface than copper or iron most valves will not grip it securely and leaks can occur; special fittings are required to enable valves to grip chrome pipe work and these must be specified at time of order.

Pipe centres:

The location of the pipe work for your radiator will be affected by the size of valves you select. All angled valves have a dimension shown to allow for adjusting pipe work. If you are planning to fix pipe work before receiving your radiators you should make adequate allowances for manufacturing tolerances in pipe centres.

If you are using straight valves, a minimum of 150mm should be allowed from the base of the radiator for ease of installation.

Please note: We endeavour to ensure all pipe centres are correct, however manufacturing tolerances must be considered; therefore we strongly recommend that pipe work is not altered or adjusted until the new radiator or towel rail is fitted. The Radiator Company will not accept any responsibility for claims resulting from incorrect pipe centres.

If you require any assistance choosing your valves please contact us on 01342 302250.

115mm

Vintage TRV shown on pages 59, 61 & 71

The Vintage TRV valve offers great value.

- Made from die cast brass
- Best suited to 2, 3, & 4 column Ancona's®

Vintage TRV special return valves www

Vintage TRV valves are available in a selection of handed return angled valve options. Return angled valves are left and right handed, you can select the correct option by identifying which side of the radiator has the flow connection; e.g flow connection on the left side requires a left hand wheelhead and matching lockshield.

Please specify left or right hand return for the wheelhead when ordering the return angle valves, Chrome is available from stock in 3 - 5 working days, delivery is 5 weeks for all other finishes. Please call 01342 302250 for more information.

Exclusive to the Ancona®, Ellipsis and Intenso radiators and the Ellipsis Towel Rail you have the option to fully coordinate your radiator colour with your valves and pipe covers to create a unique and individual statement.

The following range of valves can be painted in the same colour as your radiator from any of the 188 RAL options plus 23 exclusive special finishes available, when ordered at the same time as the radiator or towel rail required and in the same colour.

To provide complete coordination, simply follow these four easy steps:

1. Select your valve;

Pistol TRV in RAL 7040

Model	Colours Ex VAT	Colours Inc VAT
VVPISLTRV	£249.00	£298.80

Minimalist in Gun Metal Grey

Model	Colours Col Model Ex VAT Inc

Model	Colours Ex VAT	Colours Inc VAT
VVCYL	£139.00	£166.80

Model	Colours Ex VAT	Colours Inc VAT
VVCRO	£204.00	£244.80

2. Select your colour from colour groups 9 & A.

188 RAL colours plus 23 special finishes

The 23 additional special finishes include Gun Metal Grey, Textured White and Ivory, Mottled Copper, Mottled Silver, Textured Black & Dark Grey, RAL 9006 and RAL 9007, see right for a few of the special finish options or page 57 for more information.

Please call 01342 302250 for RAL & Special Finish charts.

3. Select matching pipe covers and shrouds.

We can also match the colour of the pipe covers and pipe shrouds for your Ancona®, Ellipsis, Intenso radiators and Ellipsis Towel Rails in any one of group 9 colour options shown above. Each pair of painted pipe covers comes with matching shrouds (see picture right).

Model	Description	Chrome Ex VAT	Colour Ex VAT	Chrome Inc VAT	Colour Inc VAT
AAPIPECOV	Pipe covers	£30.00	£56.00	£36.00	£67.20

Each set is supplied with 2 x 160mm pipe covers and 2 shrouds. Delivery on coloured pipe covers is 4 weeks; chrome are held in stock.

4. Order your matching valves and pipe covers at the same time you order your radiator

Please specify angled or straight, as well as the RAL colour or special finish at time of order. Delivery time is 4 weeks. For Pistol TRV pipe centres please see page 111, for Minimalist, Crosshead and Cylinder pipe centres see page 112.

Pistol TRV shown on pages 15, 19, 32 & 45.

Available in three standard finishes as well as painted options, the Pistol TRV is available in angled or straight configurations.

Pipe covers & Shrouds

We offer 2 different options for you to choose from;

1. Matching Pipe Covers & Shrouds available in 7 set colours; White, Chrome, Antique Copper, Nickel, Brass, Antique Brass & Black.

Pipe covers and shrouds are the perfect method of creating a neat finish for your radiator, they remove the need to paint copper pipes and hide unsightly holes drilled in the floor or wall for the feed pipe. Available in 7 standard finishes they can be delivered in 3-5 working days. Each set is supplied with two 160mm covers and two shrouds.

Save money when you buy your pipe covers and shrouds as part of a valve kit, see pages 109 and 111 for more information.

2. Painted Pipe Covers and Shrouds

For a totally co-ordinated look you can order matching pipe covers and shrouds to complete your Ancona®. They can be ordered in the same colour and only at the same time as your chosen radiator in any one of 188 RAL colours and 23 special finishes; see colour group \bigcirc or \bigcirc on page 110.

Each set is supplied with 2 x 160mm pipe covers 2 shrouds, delivery on coloured pipe covers is 4 weeks.

Model	Description	Colour Ex VAT	Colour Inc VAT
AAPIPECOV	Pipe covers	£56.00	£67.20

Mottled Copper Pipe Covers & Shrouds

Covers & Shrouds

115

Please Note: Painted Pipe Covers & Shrouds must be ordered at the same time as your radiators & towel rails and in the same colour.

Save money when you buy your pipe covers and shrouds as part of a valve kit, see pages 109 and 111 for more information.

A nominal £5 charge for postage and packing will be applied to any orders under £50 in value

Heating Elements & Dual Fuel Kits

All available from stock and delivered in 3 - 5 working days.

Dual fuel is a great way to warm your towels during the summer months when the main heating system is turned off. Adapting your towel rail to dual fuel is easy to achieve; a separate 'T-piece' or Dual Fuel valve is used to allow the installation of an electric element alongside the standard water feed pipe.

All towel rails that can be converted to dual fuel will have a dual fuel symbol in the technical section

Follow these simple stages to select the correct Dual Fuel Kit for your towel rail.

1. Valve Configurations

The pictures opposite show a Poll Chrome with three valve options, two showing the addition of an electric element; note the positions of the valve tail for the water pipe, in each

All radiators will require a valve, select either a T-piece or a Dual Fuel valve to suit your installation.

2. Types of Element

There are five types of electric element to choose from (see opposite) and all are supplied with a 50mm T-piece as standard.

3. How to choose your Element

It is important to select the correct size element for your towel rail Too small and it will not provide enough heat, too large and it can

The chart opposite will help you choose the right size element; we have listed the towel rail output in watts and the corresponding recommended size of element.

Towel Rail output in Watts	Electric Elements
Up to 359	200w
360 - 479	300w
480 - 719	400w
720 - 959	600w
960 - 1199	800w
1200 plus	1000w

Optional 75mm T-Piece

50mm T-Pieces are provided as standard with all of our elements. 75mm T-Pieces are available as an optional extra, if you need additional length to match your pipe centres or you would like a different aesthetic finish.

Model	Description	Price Ex VAT	Price Inc VAT
AATPIECE75	Chrome T-Piece 75mm	£5.00	£6.00
AATPIECE75	White T-Piece 75mm	£5.00	£6.00
AATPIECE75	Brushed Nickel T-Piece 75mm	£5.00	£6.00

Dual Fuel Valve

All towel rails that use the central heating system to heat up require valves; the Dual Fuel Valve has been specifically designed for use with electric elements. Combining the role of the valve and T piece it has an entry point for the element; this creates a neater finish and keeps pipe centres in line with the collector preventing major changes in pipe work.

Shine shown on page 7

Steel & Acrylic; 70mm steel flat tube radiator cloaked with a high design slimline panel & acrylic cover including dimmable LED lighting (see below)

Finish

Available in 2 finishes; Black or White radiator with clear acrylic cover.

Delivery

Made to order: 5 weeks

Important Note:

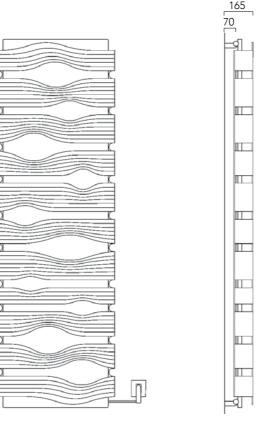

The Shine has built in dimmable LED lighting which operates using a 12v transformer (provided), it is important therefore that a suitable plug socket is located close to the final position of the radiator. The connection socket and dimmer control are positioned on the right hand rear side of the radiator.

Sectional Aluminium shown on pages 42-49

Overview

Aluminium; 4 different profiles; Vip, Oscar, Mix & Vox 10 year warranty

Finish

White RAL 9010 standard, 25 RAL Colours (listed below), 5 Special Finishes: 9006 White Aluminum, 9007 Grey Aluminium, Matt White, Matt Black, Satinato. Please call **01342 302250** for a RAL or Special Finish chart

Delivery

3-5 working days for white RAL 9010

15 working days for colours & special finishes, please allow up to 25 working days for orders of more than 10 radiators in colours or special finishes

The Sectional Aluminium range offers 4 designs to accommodate any choice of interior scheme and is incredibly versatile with hundreds of possible size options across the range all available from stock.

You can select your radiator in 3 ways

- Using the Quick Selection tables (our most popular sizes) on pages 145-147
- Use our online radiator builder to help select the best configuration for your room, www.theradiatorcompany.co.uk
- Build a radiator by section to meet your needs using the section tables on pages 148–149, you can alter the height and number of sections to achieve required BTU output within a fixed space.

Ordering your sectional Aluminium Radiator can be completed in a few simple steps

- All prices and outputs are given by section.
- Price per section includes plugs, bushes, air vent and wall brackets

First work out the required heat output for your room; to find your outputs consult your installer or you can use the heat output calculator on our website www.theradiatorcompany.co.uk, then choose one of the three methods above to specify your radiator; Quick Pick, Online or select using the following process;

- 1. Consider the rough dimensions of the radiator(s) you need for your room(s); vertical or horizontal, length, height & depth
- 2. Choose a suitable height per section allowing at least 100mm for pipework coming from the floor
- 3. Calculate the number of Sections you need by dividing the required BTU (Watt) output with the BTU (Watt) output per section; e.g 4811 BTUs divided by 420 = 11.45, (we always suggest rounding up, as it is better to have too much output, than too little) therefore 12 sections based on Vip 590
- **4. Choose your colour;** our Aluminium Radiators are now available in a selection of the top 25 most popular colours from the RAL range. Please specify your RAL colour at time of order. White RAL 9010 is our standard.

5 exclusive special finishes (Colour Group A), with optional end panels, these radiators are available from stock in up to 15 working days.

9006 White Aluminium

Please note, due to the printing process, these colours may not be representive of the true finished colour.

To order RAL Colour Charts or for help choosing sizes, please call our Customer Services team on 01342 302250

- 5. Work out the price of your radiator by multiplying the section price by the total number of sections e.g Vip 590 high, 12 sections in white = $£31.55 \times 12 = £378.60$ (inc VAT)
- 6. Place your order by using the Sectional Model Code x No. of Sections needed and noting the colour number and name selected; e.g VIP59 X 12 in White RAL 9010

Vip Quick Selection Sizes

Ancona® Stock in white pages 51-54

Overview

Steel multi column 5 year warranty

Finish

White RAL 9010

Delivery

3-5 working days: (All white in stock)

You can select your Ancona Stock radiator in 3 ways

- Using the Quick Selection tables (our most popular sizes) on page 153.
- Use our on-line radiator builder to help select the best configuration for your room www.theradiatorcompany.co.uk.
- Build a radiator by section to meet your needs using the section tables below, you can alter the height and number of sections to achieve required BTU output within a fixed space.

Ordering your Ancona Stock can be completed in 6 easy steps

- 1. Work out the required output for your room; to find your outputs consult your installer or use the heat output calculator on our website www.theradiatorcompany.co.uk
- 2. Consider the rough dimensions of the radiator(s) you need for your room(s); vertical or horizontal, length, height & depth
- 3. Choose a suitable Column depth (2, 3 or 4 column), Height & Mounting Option; slip-on welded feet, cast feet, wall brackets or stud wall brackets.
- 4. Calculate the number of Sections you need by dividing the required BTU (Watt) output with the BTU (Watt) output per section; e.g 4142 BTUs divided by 222 = 19 sections, based on 3 column, 600mm high sections (Always round up to the next whole number of sections)
- 5. Work out the price of your radiator by multiplying the section price by the total number of sections, adding the cost of your **chosen mounting option;** e.g $19 \times £23.35 = £443.65 + £72.00$ (slip-on feet) = £515.65 (inc VAT)
- 6. Place your order with your local Merchant by using the Sectional Model Code x No. of Sections needed and noting the Mounting Option you have chosen; e.g NANCS3C60W x 19 + slip-on feet

A more detailed description can be found on our web site www.theradiatorcompany.co.uk

All prices and outputs are given per section in the tables shown below. Price per section includes plugs, bushes and diverter.

Mounting options must be selected separately, these will include appropriate air vents and wall ties, please see page 152 for details.

Pipe Centres for all Anconas with Slip-on Feet, Cast Feet or Wall Brackets are:

Pipe centres left to right = number of sections x 46mm plus 24mm (12mm each) for bushes plus valves.

Pipe centres from wall (based on adjustable wall ties)	2 Column = 66mm to 3 Column = 87mm to 4 Column = 107mm
--	--

to 117mm

Please turn to page 152 to choose your mounting option.

Helpful notes & advice;

Please call us on 01342 302250 if you need any further information or help with specifying your Ancona.

Ancona sections are 46mm wide, therefore the total radiator length is; "no. of Sections x 46mm + 24mm for bushes + valves";

Due to transport and handling restrictions, Stock Ancona's are supplied pre-assembled up to a maximum of 40 sections or 60kg in weight. For radiators outside these parameters please consult Customer Services to discuss alternative requirements. All Ancona's come supplied as a finished radiator with ½" B.O.E. (Bottom Opposite End) connections as standard.

Ancona® Stock in white mounting options

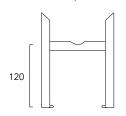

Please choose one of the following 4 mounting options and specify at time of order (fittings are available to order with a corresponding radiator only). The correct number of wall ties are supplied with each order; extra wall ties can be ordered if required.

Please note that the corresponding kit reference that applies to the tables below will be listed on your Order Acknowledgement.

Ancona Kits for Slip-on Welded Feet

Note: Please remember to add 120mm to the height of the Ancona section you have chosen if you are using Slip-on Welded Feet.

We recommend the following mounting options are used per radiator; however if you have over 16 sections with an odd number of sections you may wish to order additional feet to create a better aesthetic. For example a 25 section Ancona with slip-on welded feet would be supplied with 3 feet as standard, however the central foot would be positioned one section off centre, using an additional foot allows even distribution of feet.

No. of Sections	Column Range	No. of Slip-on Welded Feet
3 - 20	2 - 4	2
21 - 30	2 - 4	3
31 - 40	2 - 4	4

If you require additional slip-on welded feet please see pricing table right and specify at time of order

Ancona Kits for Cast Feet

Note: Please remember to add 100mm to the height of the Ancona section you have chosen if you are using Cast Feet.

We recommend the following mounting options are used per radiator; however if you have over 16 sections with an odd number of sections you may wish to order additional feet to create a better aesthetic. For example a 25 section Ancona with cast feet would be supplied with 3 feet as standard, however the central foot would be positioned one section off centre, using an additional foot allows even distribution of feet.

Ancona® Made to order pages 56-65

Overview

Steel multi column 5 year warranty

Finish

White 9010 as standard, 188 RAL colours and 23 Special Finishes Please call **01342 302250** for a RAL or Special Finish chart

Delivery

Made to Order: 4 weeks: White & Colours

Our Ancona® stock range is a comprehensive collection of the most popular sizes, however for the perfect solution the Ancona® made to order range gives you the ability to create a radiator that matches your exact requirements.

Ancona Made to Order range offers every possible choice of size, variation of steel multi column, a choice of 188 RAL colours and 23 special finishes and is delivered in just 4 weeks (see opposite page for more information).

To order RAL and/or Special Finish Charts or for help choosing sizes, please call our Customer Services team on 01342 302250 or go to our website www.theradiatorcompany.co.uk to use our radiator builder.

Ordering your Ancona Made To Order Radiator can be completed in 7 easy steps

All prices and outputs are given per section in the tables on page 156.

Price per section includes plugs, bushes and diverter. Mounting options must be selected separately, these will include the air vent and appropriate number of wall ties.

- 1. Work out the required output for your room; To find your outputs consult your installer, or use the heat output calculator on our website www.theradiatorcompany.co.uk
- 2. Consider the rough dimensions of the radiator(s) you need for your room(s); vertical or horizontal, lenght, height & depth
- 3. Choose a suitable Column depth (2, 3, 4, 5 or 6 column), Height and Mounting Option; welded feet, cast feet, wall brackets or stud wall brackets.
- 4. Calculate the number of Sections you need by dividing the required BTU (Watt) output with the BTU (Watt) output per section; e.g 4142 BTUs divided by 222 = 19 sections, based on 3 column, 600mm high sections (Always round up to the next whole number of sections)
- 5. Choose your colour from over 200 colours and special finishes; white RAL 9010 is our standard finish
- 6. Work out the price of your radiator by multiplying the section price by the total number of sections, adding the cost of your chosen mounting option; e.g $19 \times £23.89 = £453.91 + £110.40$ (welded feet kit) = £564.31 (inc VAT)
- 7. Place your order with your local Merchant by using the Sectional Model Code x No. of Sections needed, noting the Mounting Option and the name and number of colour you have chosen; e.g. ANCO360W x 19 sections, RAL 9010 pure white, with welded feet.

If you have chosen a colour use the colour reference 'R' instead of 'W' and list the colour number and name

A more detailed description can be found on our web site www.theradiatorcompany.co.uk

Helpful notes & advice;

Please call us on 01342 302250 if you need any further information or help with specifying your Ancona.

Sizes can be achieved by combining column depth, height and number of sections to achieve desired output. Ancona sections are 46mm wide, therefore the total radiator length is; "no. of Sections x 46mm + 24mm for bushes + valves"

When considering the height of your radiator remember that your mounting option will affect the overall height of your radiator

Made To Order Ancona's are supplied factory assembled up to a maximum of 40 sections or 60kg in weight. For radiators outside these parameters please consult Customer Services to discuss your requirements. All Ancona's come supplied as a finished radiator with ½" B.O.E. (Bottom Opposite End) connections as standard.

You can also choose a range of valves and accessories to complement your radiator see opposite for more information on Towel Bars, Manual Brass Airvents and Multi Brushes. Valves can be found on pages 105-111

Ancona® Made to order Colours & Special Finishes

The Ancona made to order range is availabe in White RAL 9010 as standard or it can be specified in one of the 188 RAL colours or any of the 23 special finishes (from colour group 🔼 & 💽) including Gun Metal Grey, Textured White and Ivory, Mottled, Bronze, Metallic and Gold finishes.

Call 01342 302250 for a RAL or special finish chart.

RAL Colours

Match your room style by selecting from a full rainbow of 188 RAL colours. Use either contrasting colours to create a bold statement or sympathetic colours so your Ancona® blends in to your wall.

Special Finishes

There are 23 classic colours to choose from including; metallics, mottled and textured effects, for a Special Finish chart please call our Customer Service team on 01342 302250.

Please specify your chosen RAL colour or special finish at time of order.

Stud Wall Brackets

Sold as kits these brackets are designed specifically for stud and cavity walls where standard brackets are unsuitable.

These brackets have height adjustable screws to enable accurate levelling of the radiator and a back plate which you should paint to match your wall colour.

Please order the relevant kit as shown on pages 152 (for stock) and 157 (made to order) and specify when you order your radiators. If you require additional stud wall brackets these can be ordered as pairs, please see pages 152 (for stock) and 157 (made to order) for details.

PPNANCOWFKIT	5	£180.00	£234.00	£216.00	£280.80

Ancona's with Welded Feet are supplied with the correct number of feet (see above); additional Welded Feet cannot be ordered.

Ancona Kits for Cast Feet

Note: Please remember to add 100mm to the height of the Ancona section you have chosen if you are using Cast Feet.

We recommend the following mounting options are used per radiator; however if you have over 16 sections with an odd number of sections you may wish to order additional feet to create a better aesthetic. For example a 25 section Ancona with cast feet would be supplied with 3 feet as standard, however the central foot would be positioned one section off centre, using an additional foot allows even distribution of feet.

Overview

Steel Multi Column 5 year warranty

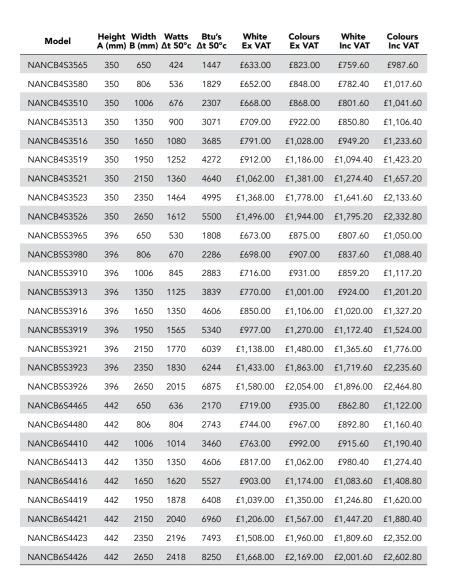

Finish

White 9010 as standard, 188 RAL colours and 23 Special Finishes Please call 01342 302250 for a RAL or Special Finish chart

Delivery

Approximately 4 weeks from receipt of written confirmation of technical drawings Please visit our website for further information www.theradiatorcompany.co.uk.

Our Ancona® radiators can be curved to fit into bay windows and around columns. Ancona® Curved is most often produced in 2, 3 or 4 column sections and can be produced in heights of 300m, 400mm, 500mm, 600mm or 750mm, with welded feet (welded feet add an additional 100mm to the height of your radiator). Alternative heights are available on request, please contact us on 01342 302250 if required. Radiators can be curved using up to 40 sections, minimum 22 sections (1012mm) for 2, 3 column or 29 sections (1334mm) for 4 column.

Curving is a precise process and as such accurate measurements and calculations must be made and checked before production can begin. Since our Ancona® Curved is made on a bespoke basis to your exact requirements we will provide a quotation for your radiator based on your approved measurements; to order your curved radiator follow these simple steps;

- 1. Visit our website www.theradiatorcompany.co.uk and select the 'Curved Ancona®' in the steel multi column section or call our Customer Service team on 01342 302250 for a copy of our design template and specification instructions.
- 2. Read the instructions carefully and then complete the template with the dimensions of your bay or column and return it to us via email, fax or post (please see contact details below).
- 3. Once we have your measurements we will prepare technical drawings and a quote for you to check and approve.
- 4. Once approved in writing by yourself we will confirm your order and expected delivery date and start production of your radiator.
- 5. Your radiator will then be delivered direct to site to minimise handling; curved radiators must be handled with care and kept on their protective pallet until installation to prevent damage.

Cast Iron Range shown on pages 66-78

Cast Iron; 4 School House, 2 Classic and Ornate Styles 10 year warranty

Ledbury, Priory, Telford & Trieste; available in primer, 26 RAL colours, 18 Special Finishes from colour group 9, Polished or Burnished (Trieste) and Lacquered. Bianco; Primer and 26 RAL colours

Linton; 26 RAL colours, 4 Special finishes, 1 Galvanised Special Finish, Polished, Burnished & Lacquered

Please call 01342 302250 for a RAL or Special Finish chart

Delivery

3-5 working days: Primer

15 working days: RAL, Specials, Lacquered, Polished, (All Linton finishes are 20 days) (for orders of 10+ radiators please allow up to 25 working days)

The Cast Iron range is incredibly versatile with literally hundreds of possible sizes, in a choice of mounting options including footed end sections, cast feet, paw feet and wall brackets. Our Cast Iron range offers six designs to accommodate any choice of interior scheme.

You can select your Cast Iron radiator in 3 ways

- Using the Quick Selection tables (our most popular sizes)
- Use our on-line radiator builder to help select the best configuration for your room www.theradiatorcompany.co.uk.
- · Build a radiator by section to meet your needs using the section tables, you can alter the height and number of sections to achieve required BTU output within a fixed space

Please see our 7 easy steps process below when ordering your sectional cast iron radiator.

To order RAL Charts or for help choosing sizes, please call our Customer Services team on 01342 302250 or go to our website www.theradiatorcompany.co.uk

Ordering your Cast Iron Sectional Radiator in 7 easy steps

- Prices and outputs are given per section.
- Price per section includes plugs, bushes & air vent. Wall ties are supplied as standard with Ledbury, Linton & Bianco radiators.
- Please specify mounting option when you place your order.

These simple steps will help you choose a Cast Iron Radiator that matches your requirements.

- 1. Work out the required output for your room; to find your outputs consult your installer or you can use the heat output calculator on our website www.theradiatorcompany.co.uk
- 2. Consider the rough dimensions of the radiator(s) you need for your room(s); vertical or horizontal, length, height & depth
- 3.Choose a suitable Column depth, Height per section and Mounting Option; footed end section, cast feet, paw feet or wall brackets for Ledbury, cast feet, paw feet or wall brackets for Bianco, footed end sections only for Trieste, cast feet, footed end sections and wall brackets for the Telford and Priory, footed end only for the Linton
- 4. Calculate the number of Sections you need by dividing the required BTU (Watt) output with the BTU (Watt) output per section; we always suggest rounding up unless space is a problem, as it is better to have too much output, than too little.
- 5.Choose your colour or finish; Your cast iron radiator can be painted in a selection of the most popular colours from the RAL range, special finishes, in a polished or burnished finished (Trieste) or a lacquered finish (excluding the Bianco which is available in primer or RAL colours only). Please specify your chosen colour at time of order. Please note: as a result of the casting process, cast iron radiators have a rough surface finish with small imperfections which will show after the painting process.
- 6. Work out the price of your radiator by multiplying the section price by the total number of sections and adding the cost of your chosen mounting option;
- e.g Telford 3 column, 580 high, 8 section, RAL 7030 = £49.04 x 8 = £392.32 + Cast feet Kit (2) = £74.40 Total = £466.75
- 7. Place your order by using the Sectional Model Code x No. of Sections needed and noting the Mounting Option, colour name and number you have chosen
- e.g Telford, 3 column, 580 high, 8 sections with cast feet in RAL 7030 Stone Grey TELF3C58 x 18 Sections with cast feet in RAL 7032 Pebble Grey

Cast Iron Range shown on pages 66-78

Helpful advice and notes;

Please call us on 01342 302250 if you need any further information or help with specifying your cast iron radiator.

When calculating the total radiator length please take into account;

"no. of Sections x B (section width) + allowance for bushes + valves"

Details of widths and Bush allowance can be found on the relevant product page

Cast Iron Radiators are very heavy and we recommend they are floor mounted; if you wish to hang cast iron radiators on the wall you must ensure the wall is structurally sound to hold the weight of the radiator.

When calculating the height of your radiator you will need to include the height of your chosen mounting option; the Ledbury, Priory & the Trieste have heights listed with the footed end section included.

- For the Telford (non footed sizes) you will need to add + 100mm for Cast Feet
- For the Bianco you will need to add + 80mm for Cast Feet & 80mm for Paw Feet
- + 100mm for pipework if using Wall Brackets

A suitable number of wall ties will be supplied with all mounting options on Ledbury, Bianco, Linton orders only.

Cast Iron Radiators come assembled up to a maximum of 10 sections or 60kg in weight, larger radiators must be joined on site following manufacturer's instructions.

All Cast Iron Radiators come supplied as a finished radiator with 1/2" B.O.E. (Bottom Opposite End) connections as standard. Why not order a manual brass airvent to co-ordinate with your chosen colour or to match your valve - see page 155 for details.

Finishes

Painted RAL

Although our cast iron range is supplied in Primer as standard, we can supply all of our cast iron designs painted in a selection of the 26 most popular RAL colours or special finishes (see page 193) these are available from stock in up to 15 working days (20 working days for the Linton). The RAL range of colours is an industry standard & we have selected the 26 most popular colours to finish our ranges of cast iron radiators, for a RAL chart please call 01342 302250.

Please Note; delivery lead times on coloured cast iron start from when we have receipt of your chosen RAL colour number / special finish in writing; please ensure the selected RAL colour number / special finish and name is included on your order.

Special Finishes

New for this edition, we are now able to overpaint your cast iron radiator (except the Bianco & Linton) in any of the 18 special finishes from colour group 9 including; metallics, mottled and textured effects. For a Special Finish chart please call our Customer Service team on 01342 302250.

Lacquered

For a more industrial feel all our cast iron radiators (except the Bianco) can be lightly sandblasted and then treated with a protective high gloss lacquer to retain the raw characteristics of the cast iron. Available from stock in up to 15 working days (20 days for the Linton).

Polished & Burnished

Our cast iron ranges are available in a beautiful, burnished or high lustre, polished finish (except the Bianco). Created by hand, in the UK, an initial black paint is used to protect hidden, hard to access areas of the radiator and to highlight the visible polished areas; a series of burnishing and polishing processes produces the final stunning results.

Linton Special Finishes & 🔝 **Galvanised Finish**

New for this addition the Linton is a classic smooth design, available in 26 RAL colours, 4 special finishes, 1 galvanised finish as well as lacquered, burnished & polished (some of which are shown right).

161

Please note, due to the printing process, these colours may not be representive of the true finished colour. For a colour chart call 01342 302250.

Ledbury shown on pages 68-69

Overview

Cast Iron; Footed ends as standard, optional cast feet, paw feet or wall brackets 10 year warranty

Finish

Supplied in a standard primer, ready to be painted in your desired finish 26 RAL colours (see page 193), 18 special finishes from colour group 9, Polished and a Lacquer finish. Please call **01342 302250** for a RAL or Special Finish chart

Delivery

3-5 working days for primer

15 working days all other finishes, please allow up to 25 working days for orders of more than 10 radiators

Quick Selection Sizes with footed ends (widths include measurement for bushes)

Available in 3-5 working days for primer, up to 15 working days for RAL colours

For our most popular sizes of Ledbury radiators, simply find the sizes that fulfill your heat and space requirements. If this quick selection does not meet your requirements you can use the sectional stock tables adjacent to work out other stock sizes to fit your space. Ledbury radiators are priced with footed end sections included. For more details see information on page 160.

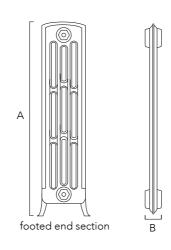

Important Note: Due to the weight of Ledbury radiators, we can only supply complete or part assembled radiators up to a maximum of 10 sections. Radiators over 10 sections must be site assembled with a suitable joining key; appropriate nipples & gaskets are supplied.

26 RAL colours available for your Cast Iron radiator to be painted in

Ledbury shown on pages 68-69

Joining Keys

Cast iron radiators come assembled up to a maximum of 10 section or 60kg in weight. Radiators larger than these will require on site assembly using an appropriate joining key.

- The Basic key is for joining up to three 2, 3 or 4 column radiators, consisting of two blocks of sections to make one radiator. For more than 3 radiators you must use the Heavy Duty joining key available on a sale or return basis.
- The Heavy Duty joining key must be used to join all 6 column radiators and any radiator (4 or 6 column) requiring more than two individual blocks of sections to be joined to make one radiator, or more than 3 radiators, in order to create the consistent torque required for a water tight seal.
- The Heavy Duty joining key is available on a sale or return basis. Joining keys must be specified at time of order for assistance please contact our Customer Service team on 01342 302250, they will also arrange a courier to collect it from you when you are ready.

Model	Description	Price Ex VAT	Price Inc VAT
PPASM	Basic Joining Key 1" x 300mm/600mm/900mm	£51.00	£61.20
PPASMT5	Heavy duty joining tool	£400.00	£480.00

Joining Keys & instructions will be provided for all orders over 10 sections & the Heavy Duty Joining Key is refundable on return.

Ledbury Sectional with footed end sections as standard please see page 164 for alternative mounting options

Basic joining key

Build your radiator to fit your requirements using individual sections shown below. For more than 40 sections please contact our Customer Services team.

Textured Stone

Ledbury mounting options

The Ledbury will be supplied with footed end sections as standard which will add 58mm to your overall height; as an alternative if you require optional Cast Feet, Paw Feet or Wall Brackets please specify at time of order.

We recommend the following mounting options are used per radiator; however if you have over 16 sections with an odd number of sections you may wish to order additional feet / footed sections to create a better aesthetic. For example a 25 section Ledbury with cast feet would be supplied with 3 feet as standard, however the central foot would be positioned one section off centre, ordering additional foot allows even distribution of feet.

3 - 15 Sections	16 - 25 Sections	26 - 40 Sections
2 Feet / Footed Sections	3 Feet / Footed Sections	4 Feet / Footed Sections
3 Wall Brackets	4 Wall Brackets	6 Wall Brackets
2 Wall Ties	3 Wall Ties	4 Wall Ties

Wall Ties are included in the price and supplied as standard for all orders. Please specify your chosen mounting option at time of order.

If you require a different number of Feet, Wall Brackets or Wall Ties, please specify at the time of order; otherwise we will ensure that we price and supply as above.

Ledbury Kits for Cast Feet

Note: Please remember to minus 58mm then add 80mm to the height of the Ledbury section if you are using Cast Feet.

Model	Number of Feet	Primer Ex VAT	RAL Colour Ex VAT	Special Finish or Lacquer Ex VAT	Primer Inc VAT	RAL Colour Inc VAT	Special Finish or Lacquer Inc VAT

Priory shown on pages 70-71

Overview

Cast Iron; Footed ends as standard, optional cast feet, paw feet or wall brackets 20 year warranty

Finish

Supplied in a standard primer, ready to be painted in your desired finish 26 RAL colours (shown on page 193), 18 special finishes from colour group 9, Polished and a Lacquer finish. Please call **01342 302250** for a RAL or Special Finish chart

Delivery

3-5 working days for primer

15 working days all other finishes, please allow up to 25 working days for orders of more than 10 radiators

Quick Selection Sizes with footed ends (widths include measurement for bushes)

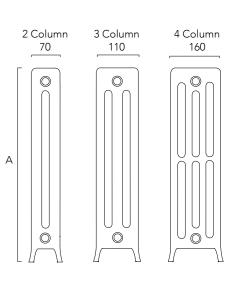

Available in 3-5 working days for primer, up to 15 working days for RAL colours

For our most popular sizes of Priory radiators, simply find the sizes that fulfill your heat and space requirements. If this quick selection does not meet your requirements you can use the sectional stock tables adjacent to work out other stock sizes to fit your space. Priory radiators are priced with footed end sections included. For more details see information on page 160.

Important Note: Due to the weight of Priory radiators, we can only supply complete or part assembled radiators up to a maximum of 10 sections.

Radiators over 10 sections must be site assembled with a suitable joining key available on a sale or return basis; appropriate nipples & gaskets are supplied.

Priory mounting options

Joining Keys

Cast iron radiators come assembled up to a maximum of 10 section or 60kg in weight. Radiators larger than these will require on site assembly using an appropriate joining key.

- The Basic key is for joining up to three 2, 3 or 4 column radiators, consisting of two blocks of sections to make one radiator. For more than 3 radiators you must use the Heavy Duty joining key available on a sale or return basis.
- $\bullet\,$ The Heavy Duty joining key must be used to join all 6 column radiators and any radiator (4 or 6 column) requiring more than two individual blocks of sections to be joined to make one radiator, or more than 3 radiators, in order to create the consistent torque required for a water tight seal.
- The Heavy Duty joining key is available on a sale or return basis. Joining keys must be specified at time of order for assistance please contact our Customer Service team on 01342 302250, they will also arrange a courier to collect it from you when you are ready.

Model	Description	Price Ex VAT	Price Inc VAT
PPASM	Basic Joining Key 1" x 300mm/600mm/900mm	£51.00	£61.20
PPASMT5	Heavy duty joining tool	£400.00	£480.00

Joining Keys & instructions will be provided for all orders over 10 sections & the Heavy Duty Joining Key is refundable on return.

The Priory will be supplied with footed end sections as standard (height includes the 70mm footed end height); as an alternative if you require optional Cast Feet or Wall Brackets please specify at time of order.

We recommend the following mounting options are used per radiator; however if you have over 16 sections with an odd number of sections you may wish to order additional feet / footed sections to create a better aesthetic. For example a 25 section Priory with cast feet would be supplied with 3 feet as standard, however the central foot would be positioned one section off centre, ordering additional foot allows even distribution of feet.

3 - 15 Sections	16 - 25 Sections	26 - 40 Sections			
2 Feet / Footed Sections	3 Feet / Footed Sections	4 Feet / Footed Sections			
3 Wall Brackets	4 Wall Brackets	6 Wall Brackets			
2 Wall Ties	3 Wall Ties	4 Wall Ties			

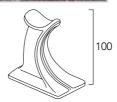

Wall Ties are included in the price and supplied as standard for all orders. Please specify your chosen mounting option at time of order.

If you require a different number of Feet, Wall Brackets or Wall Ties, please specify at the time of order; otherwise we will ensure that we price and supply as above.

26 RAL colours available for your Cast Iron radiator to be painted in

Old Gold

Telford shown on pages 72-73 NEW

Overview

Cast Iron; Cast feet as standard optional footed ends or wall brackets available. 10 year warranty

Finish

Supplied in a standard primer, ready to be painted in your desired finish 26 RAL colours (shown on page 193), 18 special finishes from colour group 9, Polished and a Lacquer finish. Please call 01342 302250 for a RAL or Special Finish chart

Delivery

3-5 working days for primer

15 working days all other finishes, please allow up to 25 working days for orders of more than 10 radiators

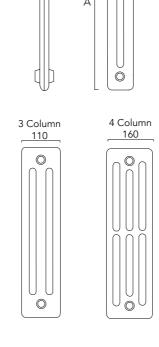

2 Column 70

Quick Selection Sizes mounting options to be added (widths include measurement for bushes) available in 3 - 5 working days for primer, up to 15 working days for RAL colours

For our most popular sizes of Telford radiators, simply find the sizes that fulfill your heat and space requirements. If this quick selection does not meet your requirements you can use the sectional stock tables adjacent to work out other stock sizes to fit your space For more details see information on page 160.

Important Note: Due to the weight of Telford radiators, we can only supply complete or part assembled radiators up to a maximum of 10 sections. Radiators over 10 sections must be site assembled with a suitable joining key available on a sale or return basis; appropriate nipples & gaskets are supplied.

Telford mounting options

The Telford will be quoted with cast feet as standard which will add 100mm to your overall height; if you require optional Wall Brackets please specify at time of order. Footed ends are available in limited sizes, see page 169.

We recommend the following mounting options are used per radiator; however if you have over 16 sections with an odd number of sections you may wish to order additional feet / footed sections to create a better aesthetic. For example a 25 section Telford with cast feet would be supplied with 3 feet as standard, however the central foot would be positioned one section off centre, ordering additional foot allows even distribution of feet.

3 - 15 Sections	16 - 25 Sections	26 - 40 Sections
2 Feet	3 Feet	4 Feet
3 Wall Brackets	4 Wall Brackets	6 Wall Brackets
2 Wall Ties	3 Wall Ties	4 Wall Ties

Wall Ties are included in the price and supplied as standard for all orders. Please specify your chosen mounting option at time of order.

If you require a different number of Feet, Wall Brackets or Wall Ties, please specify at the time of order; otherwise we will ensure that we price and supply as above.

Telford Kits for Cast Feet

Note: Please remember to add 100mm to the height of the Telford section you have chosen if you are using Cast Feet.

Joining Keys

Cast iron radiators come assembled up to a maximum of 10 section or 60kg in weight. Radiators larger than these will require on site assembly using an appropriate Joining Key.

- The Basic key is for joining up to three 2, 3 or 4 column radiators, consisting of two blocks of sections to make one radiator. For more than 3 radiators you must use the Heavy Duty Joining Key available on a sale or return basis.
- The Heavy Duty joining key must be used to join all 5 or 6 column radiators and any radiator (2, 3, 4, 5 or 6 column) requiring more than two individual blocks of sections to be joined to make one radiator, or more than 3 radiators, in order to create the consistent torque required for a water tight seal.
- The Heavy Duty Joining Key is available on a sale or return basis. Joining
 Keys must be specified at time of order for assistance please contact our Customer
 Service team on 01342 302250, they will also arrange a courier to collect it from you
 when you are ready.

26 RAL colours (see page 193), 3 Special Finishes, Polished, Burnished and Lacquered finishes plus 1 Galvanised Finish (details below)

Please call 01342 302250 for a RAL or Special Finish chart

Delivery

Made to order: 20 working days all finishes

Up to 30 working days for orders of more than 10 radiators

Linton Finishes 26 RAL Colours

The Linton is available in a range of colours from the RAL range, an industry standard range of colours. Select from 26 of the most popular colours, produced to order and delivered in up to 20 working days.

4 Special Finishes

Four exclusive special finishes are available for the Linton, a special two pack paint system is used to create some exciting and impactful finishes, including a galvanised effect for Ancient Brass.

Coft Cold

Slate Grey

Flat Bl

Burnished, Polished & Lacquered

Created by hand, an initial black paint is used to protect hidden, hard to access areas of the radiator and to highlight the visible polished areas; a series of burnishing and polishing processes produces the final stunning results.

For a more industrial feel the Linton can be lightly sandblasted and then treated with a protective high gloss lacquer to retain the raw characteristics of the cast iron

Burnished

d Lacquered

Galvanised Finish

The Linton can be finished with a full galvanised top coat. The galvanic process applies a coating of Metal (copper in this case) which is then finished to create an aged effect.

Antique Copper

Please note, due to the printing process, these colours may not be representive of the true finished colour. For a colour chart call 01342 302250.

Please turn to page 172 for details of prices and sizes of the Quick Selection and Sectional Linton ranges.

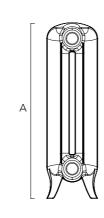

Quick Selection Sizes (widths include measurement for bushes)

Delivered in 20 working days

For our most popular sizes of Linton radiators, simply find the sizes that fulfill your heat and space requirements. If this quick selection does not meet your requirements you can use the sectional stock tables below to work out other stock sizes to fit your space. Linton radiators are priced with footed end sections included. For more details see information on page 171.

Important Note: Due to the weight of Linton radiators, we can only supply complete or part assembled radiators up to a maximum of 10 sections. Radiators over 10 sections must be site assembled with a suitable joining key available on a sale or return basis; appropriate nipples & gaskets are supplied, see page 170 for details.

Joining Keys

Trieste radiators come assembled up to a maximum of 10 section or 60kg in weight. Radiators larger than these will require on site assembly using an appropriate Joining Key.

- The Heavy Duty joining key must be used to join all Trieste radiators and any radiator (4 or 6 column) requiring more than two individual blocks of sections to be joined to make one radiator, or more than 3 radiators, in order to create the consistent torque required for a water tight seal.
- The Heavy Duty Joining Key is available on a sale or return basis. Joining Keys must be specified at time of order for assistance please contact our Customer Service team on 01342 302250, they will also arrange a courier to collect it from you when you are ready.

Model	Description	Price Price Ex VAT Inc VAT
PPASMT5	Heavy duty joining tool	£400.00 £480.00

Joining Keys & instructions will be provided for all orders over 10 sections & the Joining Key is refundable on return.

BIAN6C87	871	55	170	580	£68.13	£95.38	£81.76	£114.46

В		
Bianco	Pipe centres left to right	Pipe centres from wall
4 Column	55 x number of sections + 28mm bushes + valves	121mm - 141mm
6 Column	55 x number of sections + 28mm bushes + valves	160mm - 180mm

The Bianco will be quoted with cast feet as standard which will add 80mm to your overall height; as an alternative if you require optional Paw Feet or Wall Brackets please specify at time of order.

We recommend the following mounting options are used per radiator; however if you have over 16 sections with an odd number of sections you may wish to order additional feet to create a better aesthetic. For example a 25 section Bianco with cast feet would be supplied with 3 feet as standard, however the central foot would be positioned one section off centre, ordering additional foot allows even distribution of feet

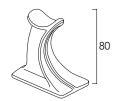

3 - 15 Sections	15 Sections 16 - 25 Sections			
2 Cast / Paw Feet	3 Cast / Paw Feet	4 Cast / Paw Feet		
3 Wall Brackets	4 Wall Brackets	6 Wall Brackets		
2 Wall Ties	3 Wall Ties	4 Wall Ties		

Wall Ties are included in the price and supplied as standard for all orders. Please specify your chosen mounting option at time of order.

If you require a different number of Feet, Wall Brackets or Wall Ties, please specify at the time of order; otherwise we will ensure that we price and supply as above.

Bianco Kits for Cast Feet

Note: Please remember to add 80mm to the height of the Bianco section you have chosen if you are using Cast Feet.

Poll Chrome	Pipe centres left to right	Pipe centres from wall
Poll Chrome	width - 30mm	57mm - 65mm

The Poll Chrome is different to the Poll as it does not have a top and bottom collector; this is so it can be finished in a deep and lustrous chrome

181

Griffin shown on page 89

Overview

Steel; 40mm trapezoid collectors, 32mm flat cross tubes 5 year warranty

Finish

White 9016 as standard, 188 RAL Colours, 10 Special Finishes & Chrome Please call **01342 302250** for a RAL or Special Finish chart

Delivery

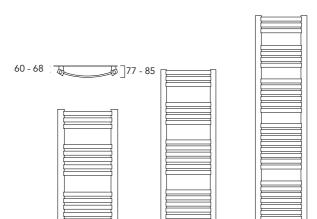

Stock Sizes: 3-5 working days (shown in **bold**)

Made to Order: 4 weeks: White, Colour, Chrome & Electric

Helpful Advice

Made to Order

We pride ourselves in having the widest range of sizes, options, colours and accessories so that you have literally thousands of options to choose from.

This means that you can have almost any radiator made to order so that it perfectly suits the space you have available, your interior design and it will also match your heat requirements.

Colour Options

Many of our designs are available in a large selection of RAL colours (188 internationally recognised paint colours) and Special Finishes. If you would like a copy of our RAL or Special Finish chart please contact us on 01342 302250. Please note that due to the printing process and manufacturing tolerances the colour (including white) of a finished radiator may vary slightly from the colours represented in the brochure and from one colour group to another as well as from our Special Finish & RAL charts. It should also be noted that if the same type of radiators are ordered and produced they may also differ in finished colour from any previously ordered.

Stock

To provide the best possible service we hold the most popular sizes of white and chrome models in stock. So if you need quick delivery look in the technical section for models listed with **bold** prices; these can usually be delivered within 3-5 working days.

How much heat?

We always recommend you choose radiators with a higher output than required, as you can always turn them down & have the reassurance of additional heat in really cold spells.

How is heat output measured?

There are two recognised measurements for heat output; BTU's (British Thermal Unit) and Watts. Within this brochure you will find both listed in the technical section by each radiator.

Delta T's

The heat output of a radiator is established using a calculation called a delta T (Δ T), based on a desired room temperature of 20°c and boiler flow and return temperatures; European standards use delta T50°c as a measurement, this is based on a boiler flow temperature of 80°c and a return of 60°c (80°c + 60°c \div 2 - 20°c=50°c). Some systems using renewable energy sources may have different flow and returns and therefore different delta T's (e.g 60° c/ 40° c = Delta T 30° c). If you require outputs based on alternative delta's please contact us on 01342 302250.

EN442

Our radiators are produced & outputs measured according the European standard EN442. This standard uses Delta T50°c to provide a consistent and comparative output measurement. Some installers may still use the old Delta T60 as a measure of output, to convert use the following correction factors; Δ T50 to Δ T60 multiply by 1.267, Δ T60 to Δ T50 multiply by 0.781

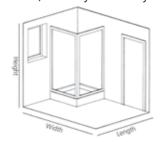

How can I find out what heat outputs I need?

Your installer should be able to confirm the exact requirements for each of your rooms, but you can also visit our website (www.theradiatorcompany.co.uk) and use our online heat calculator or use the following simple calculation as a guide;

- 1. Find the volume of your room in cubic feet = height x width x length (To convert cubic meters into cubic feet multiply the total figure by 35.31).
- 2. Multiply the volume by 6 to find the Btu requirement. If you need to know the Watts equivalent, divide your Btu by 3.412.

For example:

A bathroom 6'x8' with 8' ceilings = a volume of 384 cubic feet multiply by 6 = 2304 Btu's

You may need more than 1 radiator in order to ensure an even distribution of heat in a large room, if so divide the required output by the total number of radiators you could sensibly place in the room.

e.g. a lounge 14' x 18' x 8' ceilings = 12096 Btu's. Two radiators would require an output of = 6048 Btu's each, 3 radiators = 4032 Btu's each

Do different designs affect output?

By altering the size, shape or number of tubes or columns in a radiator you can adjust the output achieved, as this adds or subtracts surface area, the main contributor to heat output. For example the multiple column of our Ancona® range provide huge flexibility in achieving the right output in a limited space.

Single double or triple radiators

Using models with additional rows of tubes or multiple columns maximises heat output within the same wall space.

Our Water Lily design comes in single or double versions, as an example of comparative heat outputs:

Water Lily single 2010mm x 305mm = 2228 Btu's Water Lily double 2010mm x 305mm = 3323 Btu's

Horizontal or Vertical;

Many or our designs are available in horizontal or vertical options which means you can maximise the use of ceiling heights and long low spaces, without losing output.

How to order

Order your radiator in six easy steps

- 1. Confirm your heat output requirements; this ensures the radiators you choose will deliver the heat output you need (see page 190 or use the heat output calculator on our website www.theradiatorcompany.co.uk).
- 2. Choose your design; our range has everything from traditional cast iron to modern feature radiators (even an environmentally friendly aluminium range), with an extensive choice of sizes, colours & outputs.
- 3. Select a size that matches the heat output requirement; outputs are shown in our technical section & will help you and your installer to find the best match for your needs.
- 4. Choose the colour you want; with over 230 colours and special finishes you are able to match your colour scheme or introduce an accent colour to create a striking feature. To help choose your colour most products belong to a colour group shown in the technical section; e.g <a>§
- 5. Find a valve; to complete the look choose from our wide selection of valves and add any accessories that complement your choice.
- 6. Order from your nearest showroom or merchant; to find your nearest branch call us on 01342 302250 or visit www.theradiatorcompany.co.uk.

For help in choosing a sectional radiator visit our website to use the Radiator Builder tool for Ancona® Steel Multi Column, Cast Iron and Sectional Aluminium.

Our Product Range

- All our radiators are produced and outputs measured in accordance with European standard EN442.
- Radiators are supplied with BOE connections as standard unless stated otherwise; B2 underneath connections can be supplied with selected models. Full technical details can be found from pages 118 to 189 and all details are in accordance with our manufacturing partner's terms of reference at the time of going to print.
- Due to the excessively corrosive nature of chlorine we do not recommend that radiators & towel rails are placed in swimming pool environments. In addition radiators should not be located in areas that have long term exposure to high levels of moisture.
- When commissioning any radiator (including aluminium) on an indirect/closed system we recommend using a suitable mixed metal inhibitor in suitable quantities to protect against scale & corrosion.

Electric / Dual Fuel

The majority of our towel rails can be converted to work as dual fuel models. An element and T-piece is needed to adapt the towel rail; your installer will need to be aware if you wish to do this in order to adjust pipe centres accordingly. See pages 116 - 117 for our range of elements. If a towel rail is suitable for dual fuel it will be noted in the Product Information box.

Pipe Centres

We endeavour to ensure all pipe centres are correct, however manufacturing tolerances must be considered; therefore we strongly recommend that pipe work is not altered or adjusted until your new radiator or towel rail is delivered. The Radiator Company will not accept any responsibility for claims resulting from incorrect pipe centres.

Delivery

Please note that many of our factories close for 2 - 4 weeks during the holiday periods of July/August and December. This may extend the delivery period quoted for non stock, made to order, items ordered during July/August and December/ January. We will confirm the expected delivery date on our order acknowledgment at the time of order. Unfortunately deliver to Scotland / Offshore Islands may take longer due to the distances involved. Deliveries will be made to the nearest hard standing area. A nominal £5 charge for postage and packing will be applied to any orders under £50 in value.

Systems

All radiators and towel rails featured in this brochure are suitable for indirect/closed systems that comply with 'BS5449, section 1 forced circulation hot water systems'.

Systems running with low pressures (under 1 Bar) or microbore pipework may experience flow and heating issues if not accounted for in the system design which could result in radiators not heating fully or noisy pipework.

Direct heating systems use your hot water supply to heat a radiator; usually this will occur in a bathroom. If you have any radiators or towel rails linked to a direct system they should be made from either stainless steel or brass to avoid rusting and contaminating the hot water supply.

Powder coat finishes and Painted cast iron

It should be noted that due to the production process colours can vary by +/- 5-10% from samples provided and between radiators ordered in the same colour at different times.

All painted cast iron radiators will be checked and tested prior to despatch. Care must be taken when handling and joining painted cast iron radiators on site to avoid damaging the finish. Cast iron radiators will be supplied with a small bottle of touch up paint in case of damage to the finish during installation, however it should be noted that this may vary slightly from the standard powder coat finish. As a result of the casting process, cast iron radiators have a rough surface finish with small imperfections which will show after the painting process.

Terms & Conditions

For a copy of The Radiator Company full Terms & Conditions please call our Customer Services department on 01342 302250 or visit www.theradiatorcompany.co.uk

The following Q&As are based on questions posed by our Customers in relation to leaking, damaged, scratched or imperfect radiators.

Should the answer to your question not be on the list or should you just wish to talk with one of our team, please do not hesitate to contact our Customer Service team on 01342 302250 or e-mail us on sales@theradiatorcompany.co.uk.

For a copy of The Radiator Company full Terms & Conditions of sale please call our Customer Services department on 01342 302250 or visit our website at www.theradiatorcompany.co.uk.

Q. Will you replace my leaking radiator?

If your radiator is leaking and the leak is not from where the valves connect to the radiator or where the airvent is fitted (in which case this is almost certainly an installation problem), then yes we will replace your radiator. The Radiator Company may choose to replace just the damaged or leaking sections of a sectional radiator, however the radiator will still look and work perfectly.

Q. Will you replace my scratched, damaged or imperfect radiator?

A. Yes, The Radiator Company will replace all scratched, damaged or imperfect radiators, as long as they have not been installed and we are notified within 28 days of the signed delivery note. We would also ask that they are available to be returned to us at the time of the replacement, in their original condition and packaging.

Q. Why do I need to return the leaking, damaged, scratched or imperfect radiator?

As with other companies who supply high quality products (e.g. kitchen appliances), TRC require the return of the damaged item for quality checking and safe disposal or recycling of materials; a full credit cannot be given unless the damaged radiator is returned.

Q. Why does the radiator need to be in its original packaging?

A. It is important for all scratched, damaged or imperfect radiators to be in their original packaging so that they are protected when they are being returned and so that we can also determine if they were scratched or damaged pre-or post-delivery. Leaking radiators do not have to be in their original packaging but we would ask that they are packaged as well as possible for transport, to prevent further damage prior to quality checking.

Q. Will the replacement take as long to arrive as my original order?

A. We hope to be able to replace your radiator as quickly as possible and it should be faster than your original order; we will also try to keep you informed throughout the process. Please see notes on delivery in our Terms & Conditions, please call our Customer Services department on **01342 302250** or visit our website at **www.theradiatorcompany.co.uk.**

Q. Will I be charged if I do not return the damaged or leaking radiator after The Radiator Company has delivered the replacement?

A. Should you not return the damaged or leaking radiator, The Radiator Company will invoice you for the full value of the replacement radiator 60 days after the replacement radiator has been delivered.

Q. Do I need to arrange for the return of the damaged, scratched or leaking radiator to The Radiator Company?

The Radiator Company will arrange for the collection of the damaged or leaking radiator from the relevant Merchant who placed the original order. They should contact us as soon as it is available for us to collect, however we do have a process that chases returns.

Q. Why does The Radiator Company limit its liability just to the free of charge replacement of the radiator?

A. The Radiator Company has adopted the same policy as all other companies who sell high value household products and we offer free of charge replacements for all damaged, leaking, scratched or imperfect products, as long our terms and conditions of sale have been met.

Q. Why is there is a restocking charge for cancelled or changed orders?

A. All stock orders can be changed or cancelled prior to despatch with no charge. To cover administration and transportation costs stock orders cancelled after despatch will be subject to a minimum 15% restocking charge; as long as they are returned in their original packaging, original condition and undamaged. However for all non stock radiators, these are bespoke and made to order, therefore they will have been manufactured specifically for the customer who orders them and are unlikely to be able to be re-sold, hence the restocking charge to cover production and administration costs; we always notify the expected restock charge in case of change or cancellation of an order on our order acknowledgement.

We hope that you will find us a fair company to deal with and that our policies reflect those of similar companies that sell high value household items such as kitchen appliances.

Should you ever have a complaint about the company or our service, please write to;
