*The appliance is suitable for an under-working installation providing that the worktop above the boiler (min. 10mm clearance) is removable for maintenance and repair.

Accessories

Greenstar System Filter

Boiler dimensions

The Greenstar Danesmoor System will fit under a standard kitchen worktop*.

Know your system

System boilers require a cylinder for storing hot water, however the major heating and hot water system components are built into the boiler itself, making it quicker and neater to install.
